

VENKATEH G

Bengaluru, Karnataka, India | +91 8792124962 | venkateshg1525@gmail.com

CAREER OBJECTIVE

Dedicated Information Science and Engineering student at SJC Institute of Technology with an impressive 8.8 CGPA tracking. Thrives on core problem-solving, possesses a rapid learning curve for technical concepts, and maintains absolute composure under pressure to ensure crisp execution. Seeking a challenging role as a Backend / Software Developer Fresher to build robust server logic and drive optimal systems execution.

EDUCATION

Bachelor of Engineering (B.E.) — Information Science & Engineering 7th Semester | Expected 2027
SJC Institute of Technology, Chikkaballapura (VTU) | CGPA: 8.8 / 10

TECHNICAL SKILLS

Programming:	Python, C, JavaScript (Frontend basics)
Web Frameworks:	Django Framework
Tools & Databases:	SQL, Git, GitHub, Cisco Packet Tracer
Core Competencies:	Core Problem Solving, Technical Execution, Composure Under Pressure, Networking Basics

ACADEMIC & PERSONAL PROJECTS

AI Based Healthcare Resource Demand Forecasting & Optimisation System Final Year Project

- Designed predictive modules using core data analytics parameters to project facility and medical supply requirements accurately.
- Structured optimization strategies to streamline resource routing and maintain system reliability during fluid demand changes.

Software Quality Predictions using Machine Learning Models Mini Project

- Constructed predictive frameworks using Machine Learning models to identify software defects and design vulnerabilities.
- Analyzed static code quality factors and baseline metric rules to evaluate robustness parameters before release phases.

CALCY (Web Calculator Application) Personal Project

- Developed a responsive full-stack utility application configured with crisp server-side math operations.
- Managed end-to-end technical product pipelines and executed smooth code deployments onto Render.com.

CERTIFICATIONS

- NPTEL Certification:** Cloud Computing (Conducted by IIT)
- Cisco Networking Academy:** CCNA — Introduction to Networks Course Certificate

CODING HACKATHONS & COMPETITIONS

- RLJIT Hackathon 2026:** Competed in an intensive team hackathon sprint, engineering core technical logic under tight time constraints and delivering a functional software solution.
- Institutional Coding Challenge:** Participated in timed competitive programming events focusing on algorithmic debugging, structured syntax correction, and efficient runtime problem-solving.
